## Summary

I am a passionate developer with an avid interest in cloud computing & data structures. Over the years, I have worked on several solutions with designers, engineers & software architects in areas that cut across retail, hospitality & enterprise solutions using diverse toolings. I love working on innovative solutions using modern tooling. I aspire to be a profound software craftsman with a focus in systems design, system architecture & system compositions, and I thrive to learn the necessary skills to pursue my goals.

## Experience

### Backend Software Engineer

#### Topskill

Feb 2021 - Present (11 months +)

1. Worked with a team of experienced engineers to build a third party payment api, integrating paystack api with other microservices.
2. Built the dashboard user API end points.
3. Adopted best coding practice using functional programming with oop in the mix.
4. Built utility module and some helper libraries for easy workflow.
5. Collaborated with frontend team to ensure easy consumption of the backend api.
6. Published the api spec to ensure ease of access from the frontend using postman documenter.
7. Deployed the server to a Digital Ocean's container using github workflow

### Backend Engineer

#### Buildhub

Aug 2020 - Mar 2021 (8 months)

Collaborated with senior software engineers and architectural craftsmen to build a Learning management system software with a primary focus on - course creation, course purchase, course review, and other crucial parts of an LMS.

### Principal Software Engineer

#### Boltcliq

Apr 2019 - Sep 2020 (1 year 6 months)

Worked with a team of backend & system engineers to design bespoke & commercial software solutions & processes using modern tools from development to production level

### Frontend Developer

## HNG Internship

Mar 2018 - Jul 2018 (5 months)

1. Translated UI/UX design from the design team into actual code
2. Turned a simple UI/UX design into a single page web app using HTML, CSS and JavaScript
3. Managed collaboration and communication using slack.
4. Handled version control and codes deployment using Git and Github

## Education

### **Buildhub CS Bootcamp**

Degree, Computer Science Foundations & Software Engineering

Feb 2018 - Jan 2019

## Skills

Node.js • PostgreSQL • MongoDB • Front-End Web Development • JavaScript • Git • Cascading Style Sheets (CSS) • Bootstrap • jQuery • WordPress
